

ANNEX Ia COVID-19 Logical Framework Template

	Results chain	Indicators	Assumptions
Overall objective: Impact	The broader, long-term change which will stem from the COVID-19 policy dialogue project and a number of interventions by other partners.	Measure the long-term change to which the project contributes.	
Specific objective(s)/ Outcome(s)	The expected direct effects of the COVID-19 policy dialogue project which will be obtained at medium term and which tend to focus on the changes in behaviour resulting from project	Measure the change in factors determining the outcome(s).	Factors outside project management's control that may impact on the outcome-impact linkage.
Outputs/ Results	The direct/tangible COVID-19 outputs/ deliverables (goods and services) delivered by the project.	Measure the degree of delivery of the outputs.	Factors outside project management's control that may impact on the output-outcome linkage.
Activities	<i>What are the key activities to be carried out, to produce the outputs? Group the activities under each result listed above and give a unique identifier number to each activity</i>	Measure the degree of success of each of the activities to deliver the expected outputs.	Factors outside project management's control that may impact on the activity outcome.

Applicants should indicate in proposals as well as in this log-frame how the COVID-19 dialogue outcomes will be communicated and demonstrated to policy target groups as well as the wider public.

Definitions:

“Impact” means the primary and secondary, long term effects produced by the Action.

“Outcome” means the likely or achieved short-term and medium-term effects of an Action’s outputs.

“Output” means the products, capital goods and services which result from an Action’s activities.

“Indicator” is the quantitative/qualitative factor or variable that provides a simple and reliable means to measure the achievement of the Results of an Action.
